

### Do

Be a gardener. Visit a garden centre and look at different plants. Could you make one in your garden? Collect water, soil, pipes, jugs and some pretty stones.

Go to a river and look at river paintings. Why do you think artists are inspired by water? Draw, paint or take photos of a beautiful river scene.

Grow potatoes. Potatoes are easy to grow and tasty to eat!

### Investigate

Place different items in a puddle or water-filled container to see which ones float and which ones sink. (Maybe not your adult's mobile phone!!)

Experiment with water current. See if you can make things move in or across water without touching them.

Make a rain gauge and use it to measure rainfall in your garden.

Watch raindrops race down a window. Choose one to watch and see what happens as it meanders down and comes into contact with other drops.

## Home Learning Ideas!

### FLOW – YEAR 3

### Explore

Visit a river and test the flow with sticks. It's easy.. just drop a stick into the water and let it race you under the bridge.

Go pond dipping. Take a net and a coloured bowl or bucket to get your collected specimens. Remember to photograph any creatures you catch after you've released them.

### Make a difference

Help organise your family's recycling, taking the glass to a bottle bank or visiting your local household waste recycling centre.

Find out how to save water around the home. Make a list of top tips to advise your family on water conservation.

At the supermarket, check out and compare the ingredients of household cleaning products, many of which contain harmful chemicals which are washed down the drain. Encourage your adults to buy eco-friendly products, or even make your own with substances like vinegar and lemon juice.

Help a member of your family to wash a car or visit an automatic car wash. Which method do you think uses the least water?
